

Year 5

Homework Project

Energy

Your homework task this term is to find out more about our topic '**Energy**' and create a project that can teach others about this current and important topic

You could:

- Create a poster about the dangers of fossil fuels
- Research some more renewable energy sources
- Design or make something that uses a renewable energy source
- Write a persuasive letter to encourage people not to use fossil fuels
- Or pick something that takes your interest

The choice is yours...

You always produce such creative and informative projects and I look forward to seeing them all! Remember to have fun and involve the whole family!

Projects to be submitted by
